Dae Yeon Kim Ph.D.

Assistant Professor, Chemical and Biomolecular Engineering, Chonnam National University
Email daeyeon_kim@jnu.ac.kr || LinkedIn || Google Scholar

EDUCATION

Ph.D.	**Seoul National University**, Seoul, Korea School of Chemical and Biological Engineering Thesis: "A study on particle deposition and clogging dynamics of colloidal suspensions in complex flow" (Advisor: Prof. Kyung Hyun Ahn)	Aug 2023
B.S.	**Sogang University**, Seoul, Korea Department of Chemical and Biomolecular Engineering Graduation honors, *Summa Cum Laude*	Feb 2017

PROFESSIONAL EXPERIENCES

Assistant Professor	Department of Chemical and Biomolecular Engineering Chonnam National University, Yeosu-si, Jeollanam-do, Korea	Mar 2026 – Present
Postdoctoral Scholar	Department of Chemical Engineering Stanford University, Stanford, CA, USA (Advisor: Prof. Sho Takatori)	Feb 2025 – Jan 2026
Postdoctoral Scholar	Department of Chemical Engineering University of California, Santa Barbara, Santa Barbara, CA, USA (Advisor: Prof. Sho Takatori)	Mar 2024 – Jan 2025
Postdoctoral Researcher	Center for Coating Materials and Processing Seoul National University, Seoul, Korea (Advisor: Prof. Kyung Hyun Ahn)	Sep 2023 – Jan 2024

RESEARCH EXPERIENCES

Research Skills

Microfluidics	• Design and fabrication of microchannel • Fluid visualization and PIV • Pressure drop measurement
Rheometry	• Rotational rheometer (ARES, AR-G2, DHR) • Extensional rheometer (Capillary Breakup Extensional Rheometer) • Passive/Active microrheology (Optical tweezer)
Capillary breakup	• Measurement of elongational property of complex fluids (polymer solution, colloidal suspension) • Direct visualization of thinning filament surface via high-speed camera
Optical tweezer	• Measurement of inter-particle interaction (e.g. Hydrodynamic interaction) • Microrheology of soft matter
Chemical labeling	• Soft vesicle labeling (SUV, GUV) • Colloids and bacteria labeling
Bacterial culturing	• Characterization and labeling • Quantitative imaging analysis

Analysis tool
- Image processing and quantitative analysis (MATLAB, Python)
- CFD simulation (COMSOL)

Research Interests

Complex materials and soft matter physics
- Colloidal suspension rheology
- Fluid-mediated interactions between colloids
- Active matter rheology and control
- Colloidal fouling onto a membrane surface (complex interactions between foulants and membrane)
- Flow instability of viscoelastic fluid

Heterogeneity control of industrial slurry (e.g. lithium-ion batteries, fuel cells, CMP slurry)
- Stability control of colloidal slurry
- Characterization of slurry for quality control

Data-driven machine learning classification
- Characterization of complex fluid
- Clogging and fouling prediction

Image-based rheological properties measurement
- Discovery of constitutive relations for complex fluids
- Dynamics of soft materials with active forcing

PRESENTATIONS

International Conference

9. Fluid-mediated rotational coupling and hydrodynamic interactions in colloidal particles using optical trapping, *APS Global Physics Summit (APS March Meeting 2025)*. 16 – 21 Mar 2025, Anaheim, CA, USA.

8. Successive deposition of poly(styrene) particles in cross-flow through T-shaped microchannel, *The 19th International Congress on Rheology (ICR 2023)*. 29 July – 4 Aug 2023, Athens, Greece.

7. Effect of salt concentration and flow rate on clogging dynamics at the single micro-pore. *The 8th Pacific Rim Conference on Rheology (PRCR 2023)*. 15 – 19 May 2023, Vancouver, BC, Canada.

6. Effect of salt concentration and flow rate on clogging dynamics at the single micro-pore. *The 93rd Annual Meeting of the Society of Rheology (SoR 93rd Annual Meeting)*. 9 – 13 Oct 2022, Chicago, IL, USA.

5. Effect of salt concentration and flow rate on clogging dynamics at the single micro-pore. *11th Korea-Australia Rheology Conference (KARC 2021)*. 24 – 25 Nov 2021, Virtual.

4. The effect of operating condition and rheological properties of PEO solution on the sessile drop oscillation during elasto-capillary thinning. *International Union of Materials Research Societies-International Conference in Asia (IUMRS-ICA 2020)*. 23 – 26 Feb 2021, Virtual.

3. Effect of rheological properties of PEO solution on the sessile drop oscillation during the early stages of elasto-capillary thinning transition. *The 15th International Workshop for East Asian Young Rheologists (IWEAYR 2020)*. 8 – 10 Jan 2020, Changchun, China.

2. Effect of rheological properties of PEO solution on the sessile drop oscillation during the early stages of elasto-capillary thinning transition. *Annual European Rheology Conference (AERC 2019)*. 8 – 11 Apr 2019, Portoroz, Slovenia.

1. Agglomerate breakup of destabilized polystyrene particles under a cross-channel planar extensional flow. *The 14th International Workshop for East Asian Young Rheologists (IWEAYR 2019)*. 23 – 26 Jan 2019, Nagoya, Japan.

Others (2023 – Present)

5. Particle Deposition, Pore Clogging, and AI-Assisted Prediction of Membrane Fouling. *KSIEC Special Symposium: AX in the Carbon-Neutral Era, Korean Society of Industrial and Engineering Chemistry*. 10 – 11 Sep 2026, Yeosu, Korea

4. Probing hydrodynamic interactions and rheology in complex fluids using optical laser tweezers. *2026 Annual Meeting of the Korean Society of Rheology*. 7 – 8 May 2026, Seoul, Korea

3. Prediction of membrane fouling via particle transport phenomena and ai-based analysis. *2026 Spring Conference of the Korean Society for Energy*. 15 – 17 Apr 2026, Yeosu, Korea

2. Direct experimental measurement of hydrodynamic interactions using optical tweezers. *Shaqfeh Group Seminar, Stanford University*. May 2025

1. A study on particle deposition and clogging dynamics of colloidal suspensions in complex flow. *EEPL Group Seminar, Dankook University*. Aug 2023

TEACHING AND MENTORING

Teaching (S:Spring, F:Fall)	Transport Phenomena (Chonnam National University)	2026F
	Chemical Reaction Engineering II (Chonnam National University)	2026F
	General Chemistry I (Chonnam National University)	2026S
	Chemical Reaction Engineering (Chonnam National University)	2026S
	Creative Academy: Basic Chemical Engineering (Janghoon High school, Seoul)	Mar 2018 – Jan 2019
TA	Transport Phenomena (Seoul National University)	Spring. 2018
	Introduction to Chemical Engineering (Seoul National University)	Fall. 2019
Mentoring	2025 ChemE REU Program Mentee: Izzie Allydice (Stanford '28)	Jul 2025 – Present
	EEPL Group, Dankook University Mentee: Minsun Hwang (B.S.–M.S. Integrated Program)	Mar 2022 – Jul 2025

AWARDS AND HONORS

Best Paper Award	DONGJIN Best Paper Award (supported by DONGJIN SEMICHEM CO., LTD.)	Jul 2022
Best Presentation Award	Best Presentation Award of 15th IWEAYR (The 15th International Workshop for East Asian Young Rheologists)	Jan 2020

Academic Scholarship	Scholarship for academic excellence (Sogang University)	Sep 2013 – Aug 2016

OTHER ACTIVITIES

Member	Young Engineers Honor Society (YEHS)	Jan 2014 – Present
Student Leader	Department of Chemical and Biomolecular Engineering Sogang University, Korea	Jan 2014 – Mar 2014
